

# Bluetooth Headset User's Guide

## Introduction

The Bluetooth wireless technology makes it possible to connect any compatible and stationary communications device without using cable. The technology is based on a radio link that offers fast and reliable transmission of voice and data information. It does not require a line-of-sight connection in order to establish communication. Bluetooth wireless technology uses a globally available frequency range intended to ensure worldwide communication compatibility.

## Overview:

The headset contains the following parts

## Preparing the Headset

To be able to use the Headset together with a mobile phone, you need to have a phone with Bluetooth system, or a phone with a Bluetooth adapter connected to it.
